

Netplan's co-location facilities at Global Switch are located near the UK's main fibre backbone, providing unrivalled connectivity.

Comprising two facilities in London's East India Dock, Global Switch set a new standard for data centre environments when it was opened in 1999.

In addition to regular security patrols, a central security hub provides facility monitoring with CCTV footage archiving facilities for peace of mind.

Global Switch provide an N+1 Uninterruptible Power Supply (UPS) provision, providing one unit beyond the normal (N) operating need, alongside back up generators and power surge management.

We have Gig links to our network in Telehouse and offer fail-over and high availability solutions access the 2 data centres.

On site staff offer assistance 24 / 7, 365 days a year.
