

# CO-LOCATION TELEHOUSE EUROPE

Netplan's co-location facilities at Telehouse European are second to none and provide all the peace of mind that you will ever need.

Based in London's Dockland's, Telehouse UK provides secure and resilient facilities within a state of the art controlled environment delivering live information on all operations within each building. TELEHOUSE Europe has been established and operating Colocation facilities for over 10 years.

Trained and uniformed security staff man each site 24/7, with time-lapse CCTV internally and externally. Proximity cards control access within the facility.

Resilience is ensured with a sophisticated power distribution system. Multiple mains electricity feeds are supported by a UPS (uninterruptible power supply) system with generator backup.

Unlike other ISP's our suite has our own technical support staff on site and ready to assist in any event ensuring your infrastructure is available 24 x 7 x 365.
